

Multi- Frame [fast]

The modular frame system ideal for rental.

The segments in which the frame is divided are of seven different sizes, from 25 to 112 cm, all easy to insert. By differently combining these segments, it is possible to obtain up to 26 different formats in 4:3, 16:10, 16:9, and 1:1. With 6 segments the smallest screen is formed, with 14 the largest.

The modularity of the system means saving! Along with a screen bought come a frame, a projecting surface and two T-stands. Buying another fabric and only two more segments it is possible to obtain an additional screen as well as other formats are created only buying the fabric and the missing segments. **With the combination of 24 segments it is possible to obtain all the 26 frame sizes in the various ratios, each of which will host its dedicated projection surface. The trolley bag, purchasable on request, is the ideal solution to carry the whole combination of segments, one or more fabrics and two adjustable T-stands.** The fabrics, strong and stretchable, have a black trimming all along their perimeter with steel eyelets and reinforced corners.

Technical details

Screen characteristics

- modular screen: several sizes in only one bag
- quick assembling
- bright, strong and stretchable fabrics
- seamless front-projection fabrics

Available fabrics

- Diamond
- Ambra retro-projection
