

Slim

The most classical ScreenLine motorized screen.

It reaches 250 cm base inside a small box with rounded corners. Its matt white finish and neutral look make it ideal for living-rooms, halls, and small and medium-sized offices.

The side covering end plates in the same colour as the box complete the screen concealing the screws. The PVC front and retro-projection fabrics are available in all sizes and formats, with or without black borders.

It is the quietest screen in its category. The special geometry of the brackets makes it possible to hang it on a rear wall, from the ceiling or even from a front beam.

With the quick&safe system, it can be hung on a rear wall, from the ceiling or from a front beam very easily.

Technical details

Screen characteristics

- 100% aluminium mechanics
- very quiet functioning
